Dec. 7, 6 pm Nixon Elementary in Palo Alto

Dec. 8, 6 pm Arundel Elementary in San Carlos

What parents are saying:

We had no real expectations but I have been blabbering about how wonderful the program is to anyone who would listen. You have done an amazing job!

My daughter has improved greatly in her math skills and confidence

It is an excellent program. We love the class

Every day my daughter reports: I'm having TOO much fun in math class! She is thrilled to find out about all the cool things you do with math and excited to be able to do it all herself. Over the weekend she drew a self-portrait with a word balloon that says 'I'm a numbers person!'

Your program has changed my daughter's life! She went from being at the bottom of her class, to the top of her class. Her teacher and I were amazed. Thank you!

Small, focused class. Making math fun.

I especially like the emphasis on word problems and the extent to which one has to read and figure out the appropriate application

In just a few days our son's understanding of math and familiarity with numbers improved dramatically. Thank you for such a great program!

A unique combination of academic rigor, fun, and genuine care for the children

We're very pleased with this program and especially with the instructor... she is an excellent role-model and has made this course both fun and educational

My son got lots of help and encouragement from your program. This term his math class work, homework, and tests are all A's. Thank you!!

They like their instructors a lot. My youngest is here now and wants to be sure I tell you that everything is excellent!
